

ILLUSTRATION

POWERING CAR PLUG DEVICES

1. Start your vehicle.
2. Insert the DC plug of the Quintezz Quattro splitter car plug into a power socket in your vehicle. The LED will light to indicate that power is available.
3. Plug the devices you wish to power (6 amps maximum combined = 3 Amps* per socket)) into one of the two 12/24V sockets on the Quattro splitter car plug.
4. Turn on your device(s).

* 1 Amp = 1000 mA

POWERING USB DEVICES

NOTE: The 2 USB Power Ports provide standard 5V/2100mA maximum (2.1A) at 10 Watts USB power for both USB ports TOGETHER.

!Port A and Port B have different functionalities!

- Port A: for all (smart)phones + all others at normal charge
- Port B: for all tablets + all others at quick charge

1. Start your vehicle.
2. Insert the DC plug of the Quintezz Quattro splitter car plug into a power socket in your vehicle. The LED will light to indicate that power is available.
3. Connect your device's USB cable to the USB Power Port on the Quattro splitter car plug and then connect the other end of the cable to your device.

The 2x 12/24V sockets and the 2x USB power ports can be used all at the same time. The power output when using all 4 ports at the same time can be maximum 8 amps.

The USB Power Ports will charge most USB chargeable devices using an appropriate USB charging cable*.

* USB cable not included, we advise using the USB charging cable that was originally supplied with your device.

IMPORTANT:

The Quintezz Quattro splitter car plug has a 8 A fuse in the DC plug that will blow if the devices that are plugged into it require more than 8 amps together. If the Splitter stops working, the fuse may have blown. To replace the fuse, simply unscrew the tip of the DC plug, remove the fuse, and replace it with a new fuse rated at 8 amps (see original fuse that was supplied). Never replace the fuse with one rated higher than 8 amps!
